# I USE THE SOAP   BREAD   05/07/20

INTRO   G, G, Em, Em, (x2)
VERSE 1

```
G                          Em
I use the soap to wash the dirt of my face
G                          Em
I write with pencil so that I can erase
C                                    Em              D      C
But what's to do when someone's taken my place with you, with you
```

VERSE 2

```
G                          Em
I know to stop when the light turns to red
G                          Em
And when it rains I know to cover my head
C                    Em                    D
But what's to do when I wish'd I were there over you,
       C          G  G//
'ver you, over you
```

BRIDGE

```
Am        C        G        D
La la la la la la la la la la la la la la la la
C          Em          D
 Plannin' to write off tomorrow
Am        C        G        D
La la la la la la la la la la la la la la la la
C          Em          D      C
Hopin' to wash off the sorrow
```

*Instrumental over the next 3 lines, then . . . .*

```
G                          Em
I woke to find that my world was not there
G                            Em
It ceased to me when I found you did not care
C                          Em                    D      C
And my ambition vanished into thin air along with you, with you
```

```
G                              Em
Now my emotions find it hard to let go
G                          Em
And as for me I'll find a new road to hoe
C                          Em                    D      C
But maybe this time I will take it more slow than before, before
        G     G//
than before.
```
